

Breteau Foundation Home Tablet Programme Overview

WHAT IS IT?

Offline learning programme that delivers **daily lessons** in literacy, numeracy, and reading comprehension for up to **30 minutes**. Each lesson is led by a self-guiding teacher who will support each child throughout the lesson across various activities. The program intuitively provides lessons based on each child's level, using thousands of learning activities via OneCourse software.

WHY DID WE LAUNCH IT?

Our BF Home Tablet Programme was originally introduced to directly address the learning loss of the COVID 19 Pandemic, which exacerbated the already wide education gap and educational inequality for children. Learning could still continue for children despite school closures or access to online learning due to a lack of connectivity. Since then, the program has been used in homes and in the classroom to support and accelerate learning.

CHILDREN CAN LEARN:

Without an adult

without an internet connection

with just 30 minutes each day

Each lesson is created for each **child, based on their level**, using **thousands of learning activities on software called OneCourse**.

In partnership with One Billion, we are delivering the Home Tablet Project to help children to learn from home.

*ONECOURSE IMPACT

- Studies in Malawi have shown that students using the numeracy strand for 30 minutes a day for 8 weeks were found to make the same progress as in one year of standard teaching practice.
- In 2019, after a 15-month field test in remote parts of Tanzania demonstrated accelerated learning in literacy and numeracy for out-of-school children using Onecourse, the product was announced joint-winners of the Global Learning XPRIZE.

*Information provide by OneBillion

- A study funded by the Education Endowment Foundation found that Year 1 children using the maths apps across schools in England made – on average – an increase of three months' progress compared to control groups. The children used numeracy software for 30 minutes per day, 4 days a week, for 12 weeks.

PARTNERSHIP WITH ONEBILLION

We've partnered with One Billion, a nonprofit that builds comprehensive, scalable educational software for children in and out of school. One Billion has worked with partners across the globe to develop and distribute their OneCourse software, a programme designed in local languages and which puts disadvantaged children at the centre of learning.

We are providing OneTab tablets, an all in one literacy and numeracy programme into the homes of our families and into the hands of children. The programme works offline, which is perfect for communities who lack access to connectivity.

IMPACT

Lebanon
900
Students

South Africa
1818
Students

UK
75
Students

In South Africa, all students that started below grade level in literacy made at least a 6 month grade level growth.

In Lebanon, 92% of children demonstrated growth in speaking and listening skills.
